

Configuration Management

PowerLaunch / User Registry

Name	Type	Enabled	Run once	Description	State	Access Control	Workspace Control	Order
Explorer, configure search options	Registry	Yes	Yes	This is a container for all the neat tweaks which affect the Search option in explorer. See individual registry values for explanations	Both	All users	All workspace containers	13
Explorer, default settings	Registry	Yes	No	Configures explorer to remove the training wheels (display, display, display and don't hide). No idea how it works. It is just a diff grab job on the explorer settings.	Both	All users	All workspace containers	1
Explorer, disable autolaunching MSN Messenger	Registry	Yes	No	Removes this as default. Should be managed through PowerFuse instead	Both	All users	All workspace containers	7
Explorer, disable desktop cleanup wizard	Registry	Yes	No	Make sure that pesky cleanup wizard doesn't come back to haunt the users every 2 months	Both	All users	All workspace containers	6
Explorer, disable hide inactive systray icons	Registry	Yes	No	Makes sure all systemtray icons are displayed always	Both	All users	All workspace containers	5
Explorer, disable screen resolution warnings	Registry	Yes	No	Get rid of the ballon message, as we're runing weird resolutions sometimes inside vmware machines.	Both	All users	All workspace containers	4
Explorer, disable security notifications for filetypes	Registry	Yes	No	This configuration is made due to that the desktop has been redirected to the users homedirectory. Windows will then start complaining that allowed filetypes, such as shortcuts etc are potential hazzards.	Both	All users	All workspace containers	12
Explorer, dissable XP Tour	Registry	Yes	No	Kills the Tour, so the user is not prompted for it during first 3 logons	Both	All users	All workspace containers	2
Explorer, hide printer and control panel from start menu	Registry	Yes	No	Currently PowerFuse only removes these icons from the Explorer tree. This removes the icons from the user's startmenu too.	Both	All users	All workspace containers	14
Explorer, override default wallpaper placement	Registry	No	No	This reghack overrides the globally configured placement. See value annotation for details	Both	All users	All workspace containers	9

Configuration Management PowerLaunch / User Registry

Name	Type	Enabled	Run once	Description	State	Access Control	Workspace Control	Order
 Explorer, performance enhancements	Registry	Yes	No	Disables a bunch of known bells and whistles in order to optimize performance under VMware	Both	All users	All workspace containers	10
 Explorer, put my computer on desktop	Registry	Yes	No	As default, XP does not put My Computer on the desktop. This reghack is for the rest of us who like it to be there as default	Both	All users	All workspace containers	8
 Explorer, redirect shellfolders	Registry	Yes	No	Changes path of My Documents, My Pictures, etc to the homedrive	Both	All users	All workspace containers	11
 Explorer, remove items from Pinned startmenu	Registry	Yes	No	Clears the upper left part of the start menu for unmanaged default icons such as IE and Outlook Express. This setting should be run-once in production to allow users to place apps here later.	Both	All users	All workspace containers	3
