

# Job Results / Super Security Audit 2.0 / Query Baseline Security (MBSA)

Property	Value
Query type	Baseline Security (MBSA)
Enabled	Yes
Comments	Offline: Query security vulnerabilities using the MBSA engine and local security cab files. If there is an internet connection present from the servers, disable this task
Query Windows vulnerabilities	Yes
Query weak passwords	Yes
Query IIS vulnerabilities	Yes
Query SQL vulnerabilities	Yes
Query security updates	Yes
Log MBSA actions	Yes
Security catalog (V2.0.1 or later)	Force use of this cab file : "wsusscn2.cab"
Security catalog (V2.0)	Force use of this cab file : "wsusscan.cab"
Security catalog (V1.2)	Force use of this cab file : "MSSecure_1033.cab"
Condition	No expressions specified
Agent	XP-READY
Finished on	21-02-2009 01:06:18 (local)
Status	Completed
Result	Completed
Job result	Refer to the following page(s) for the query results

# Job Results / Super Security Audit 2.0 / Query Baseline Security (MBSA)

Property	Value
Security Assessment	Incomplete Scan
Property / Value	
Computer name / DEMO\XP-READY	
IP address / 10.5.5.10	
Scan date / 21-02-2009 01:06	
MBSA version / 2.1.2104.0	
Catalog synchronization date / 2009-02-12T20:14:39Z	
Security update catalog / Microsoft Update (offline)	
Security assessment / Incomplete Scan	
Administrators	Strong Security : No more than 2 Administrators were found on this computer.
User	
Administrator	
DEMO\LocalAdmins	
Auditing	Security FYIs : Enable auditing for specific events like logon/logoff. Be sure to monitor your event log to watch for unauthorized access.
Autologon	Strong Security : Autologon is not configured on this computer.
Automatic Updates	Potential Risk : The Automatic Updates feature is disabled on this computer.
File System	Strong Security : All hard drives (1) are using the NTFS file system.
Drive Letter / File System	
C: / NTFS	
Guest Account	Strong Security : The Guest account is disabled on this computer.
IE Zones	Strong Security : Internet Explorer zones have secure settings for all users.
IIS Status	Check Not Performed : IIS is not running on this computer.
Incomplete Updates	Security FYIs : No incomplete software update installations were found.
Local Account Password Test	Strong Security : Some user accounts (1 of 4) have blank or simple passwords, or could not be analyzed.
User / Weak Password / Locked Out / Disabled	
Guest / Weak / - / Disabled	
HelpAssistant / - / - / Disabled	
SUPPORT_388945a0 / - / - / Disabled	
Administrator / - / - / -	
Macro Security	Check Not Performed : No supported Microsoft Office products are installed.
Password Expiration	Potential Risk : Some user accounts (2 of 4) have non-expiring passwords.
User	

# Job Results / Super Security Audit 2.0 / Query Baseline Security (MBSA)

Property	Value
Accounts with a green check have passwords that do not expire but were specified in NoExpireOk.txt Administrator Guest HelpAssistant SUPPORT_388945a0	
Restrict Anonymous	Severe Risk : Computer is running with RestrictAnonymous = 0. This level allows basic enumeration of user accounts, account policies, and system information. Set RestrictAnonymous = 2 to ensure maximum security.
Security Updates	Incomplete Scan : Computer has an older version of the client and security database demands a newer version. Current version is and minnum required version is 5.8.0.2678.
Services Service / State The following list of services should only be enabled on computers that require their functionality. Services that are not required should be disabled to reduce the attack surface of the system. Telnet / Stopped	Security FYIs : Some potentially unnecessary services are installed.
Shares Share / Directory / Share ACL / Directory ACL Access: F - Full, R - Read, W - Write, D - Delete, X - Execute, C - Change Q\$ / Q:\ / Admin Share / Directory ACL can not be read. ADMIN\$ / C:\WINDOWS / Admin Share / BUILTIN\Users - RX, BUILTIN\Power Users - RWXD, BUILTIN\Administrators - F, NT AUTHORITY\SYSTEM - F C\$ / C:\ / Admin Share / BUILTIN\Administrators - F, NT AUTHORITY\SYSTEM - F, BUILTIN\Users - RX, Everyone - RX	Security FYIs : 3 share(s) are present on your computer.
SQL Server/MSDE Status	Check Not Performed : SQL Server and/or MSDE is not installed on this computer.
Windows Firewall Connection Name / Firewall / Exceptions Connections listed without a score do not have Windows Firewall capabilities. * marks settings affected by the overall state or settings of the firewall. All Connections / Off / Programs, Services Local Area Connection 2 / Off* / Programs*, Services*	Security FYIs : Windows Firewall is disabled and has exceptions configured.
Windows Version	Security FYIs : Computer is running Microsoft Windows XP.
